QUESTIONS:	Yes	No	Comments
Does the tank have proper identification available?			
Are there cracks or signs of leakage in the man ways & nozzles?			
Is the insulation sealed around around man ways and nozzles?			
Are there any visible signs of leakage around the piping, flanges, or valves?			
Is there adequate anchoring which would prevent tank bottom from damage due to movement?			
Are there any internal corrosion liner blisters, cracks or is cracking visible?			
Is the exterior paint pitting or showing signs of corrosion?			
Does the tank have baffles?			
Is the floor sloped?			
Is the tank insulated?			
Is there a false bottom?			
Is there any evidence of corrosion to resin liner?
